

GETTING STARTED

Welcome to ArbiSmart

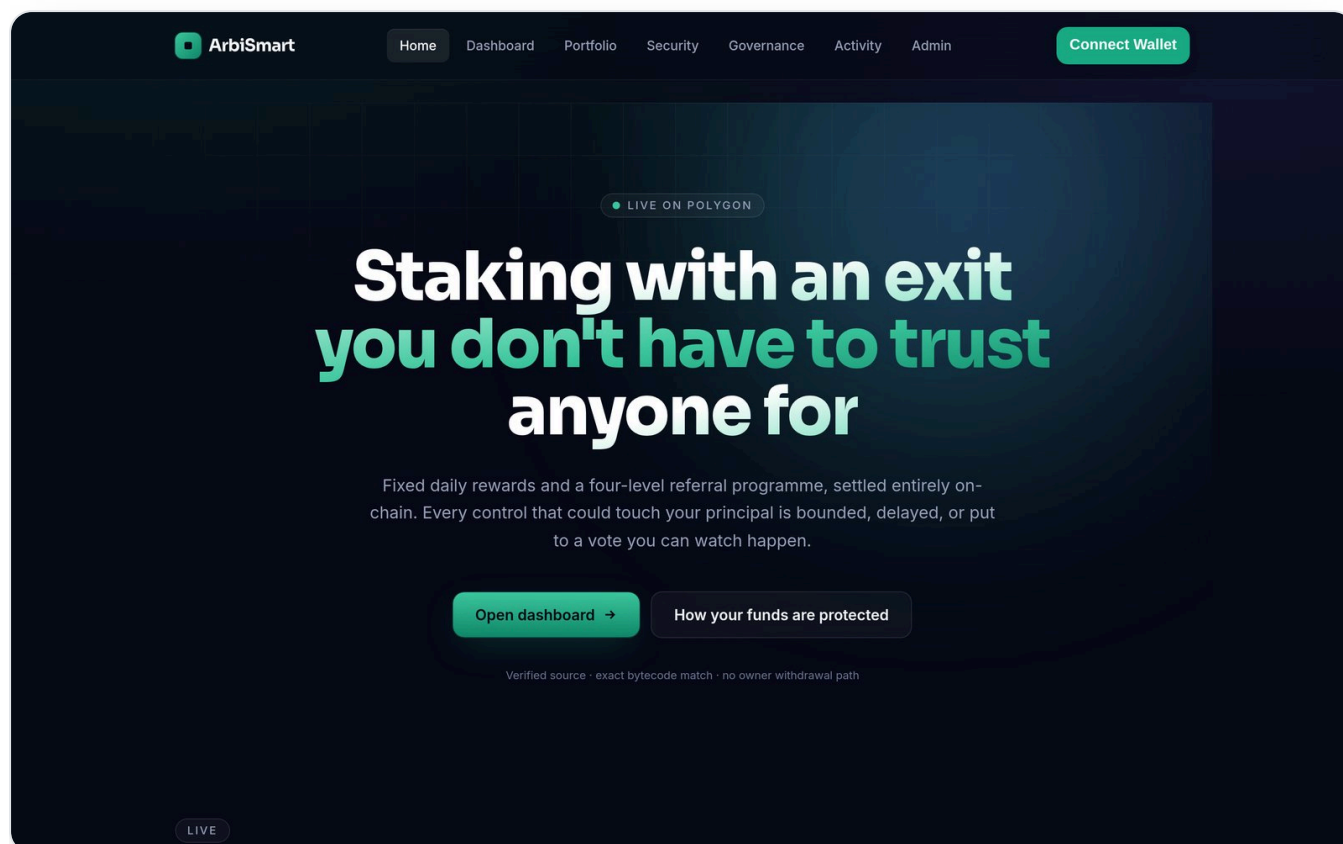

A simple walkthrough to connect your wallet, stake,
and start earning — no technical background needed.

arhub.site

WELCOME

Stake. Earn. Anytime you want, leave.

ArbiSmart lets you deposit USDT and earn a daily reward, plus extra rewards for inviting friends. Everything happens on your own wallet — nobody else can touch your funds, and you can withdraw whenever you like.

The ArbiSmart home page — arhub.site

✓ WHAT YOU NEED

Three things before you start

That's it — no forms, no account to create, no approval to wait for.

1 A crypto wallet

MetaMask is the easiest to start with — free, and available as a phone app or a browser extension. Trust Wallet, Rainbow, and Coinbase Wallet also work.

2 A small amount of POL

This is the small network fee needed to confirm each transaction on Polygon — usually just a few cents. Buy it on any exchange and send it to your wallet.

3 USDT on the Polygon network

This is what you'll stake. When you withdraw from an exchange, make sure to choose the "Polygon" network for USDT — not Ethereum, not any other chain.

Double-check the network

Sending USDT on the wrong network to your wallet is the most common mistake — and it can be hard to undo. If you're not sure, send a small amount first as a test.

1 STEP 1

Connect your wallet

This takes about 30 seconds and never asks for anything private.

1 Go to arbhub.site

Open the site and click the green
Connect Wallet
button in the top-right corner.

2 Pick your wallet

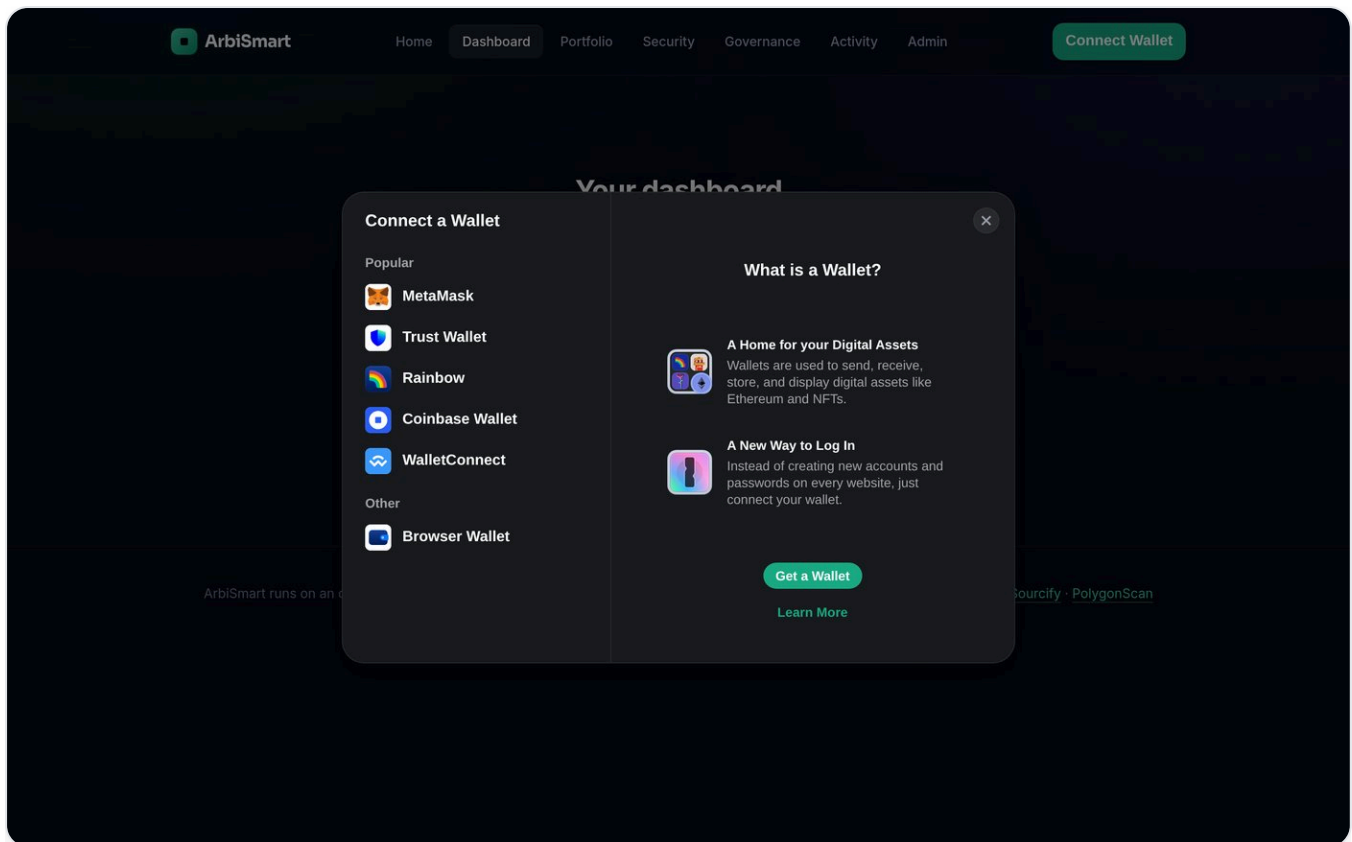

Choose MetaMask, Trust Wallet, Rainbow, Coinbase Wallet — or scan a QR code with WalletConnect to connect from your phone.

3 Approve in your wallet app

Your wallet will ask you to confirm the connection, and switch to the Polygon network if needed. Tap approve.

4 You're connected

The button now shows your wallet address. That's it — you're ready to stake.

The wallet selection screen

Your keys, your funds — always

Connecting a wallet only ever shares your public address. Nobody at ArbiSmart — and no legitimate wallet — will ever ask for your seed phrase or private key. If a pop-up asks for one, close it.

2 STEP 2

Pick a plan — or let your deposit choose

You don't pick a plan from a menu — the amount you stake decides it automatically. Stake more, unlock a better daily rate.

Pick a tier, or let your deposit pick it

Your plan is chosen automatically from the amount you stake, and upgrades as you top up.

Starter	Growth	Advanced	Elite
TIER 0	TIER 1	TIER 2	TIER 3
1.20% /day	1.80% /day	2.40% /day	3% /day
Minimum: 10 USDT	Minimum: 500 USDT	Minimum: 2,500 USDT	Minimum: 10,000 USDT
Term: 180 days	Term: 150 days	Term: 120 days	Term: 90 days
Gross over term: 216%	Gross over term: 270%	Gross over term: 288%	Gross over term: 270%

The four staking tiers

Simple example

Stake 500 USDT and you're automatically in the Growth plan, earning 1.80% every day for 150 days. Add more later and you can upgrade to a higher plan with one click.

3 STEP 3

Stake and start earning

Two clicks, on the Dashboard page.

1 Enter an amount

Type how much USDT you want to stake, or tap one of the quick plan buttons.

2 Approve USDT

The first time, your wallet asks you to allow the amount to be used — a standard, one-time step for any crypto app.

3 Tap Stake

Confirm in your wallet. Your position is active immediately, and your daily reward starts counting from that moment.

That's the whole process

No waiting period, no manual review, no customer support ticket. The moment your transaction confirms on Polygon, you're earning.

4 STEP 4

Claim your rewards anytime

Your reward grows every second. Claim it whenever you want — daily, weekly, or once a month, it's entirely up to you.

1 Open your Dashboard

It shows exactly how much you can claim right now, updated live.

2 Tap Claim

Confirm the transaction in your wallet.

3 Funds arrive instantly

Sent straight to your wallet in the same transaction — no delay.

BONUS

Earn more by inviting friends

Share your personal link. When someone stakes through it, you earn a percentage of their rewards automatically — forever, for as long as their stake stays active. It costs them nothing extra.

principal or their yield.

LEVEL	REQUIREMENT	DIRECT (F1)	SECOND (F2)	THIRD (F3)
Base	Any active stake	8%	4%	—
Silver	5 referrals + 500 USDT staked	12%	6%	2%
Gold	25 referrals + 2,500 USDT staked	15%	8%	4%
Platinum	100 referrals + 10,000 USDT staked	20%	10%	5%

Referral reward levels

How to share

Find your personal referral link on the Dashboard or Portfolio page and copy it with one tap. Send it to friends however you like.

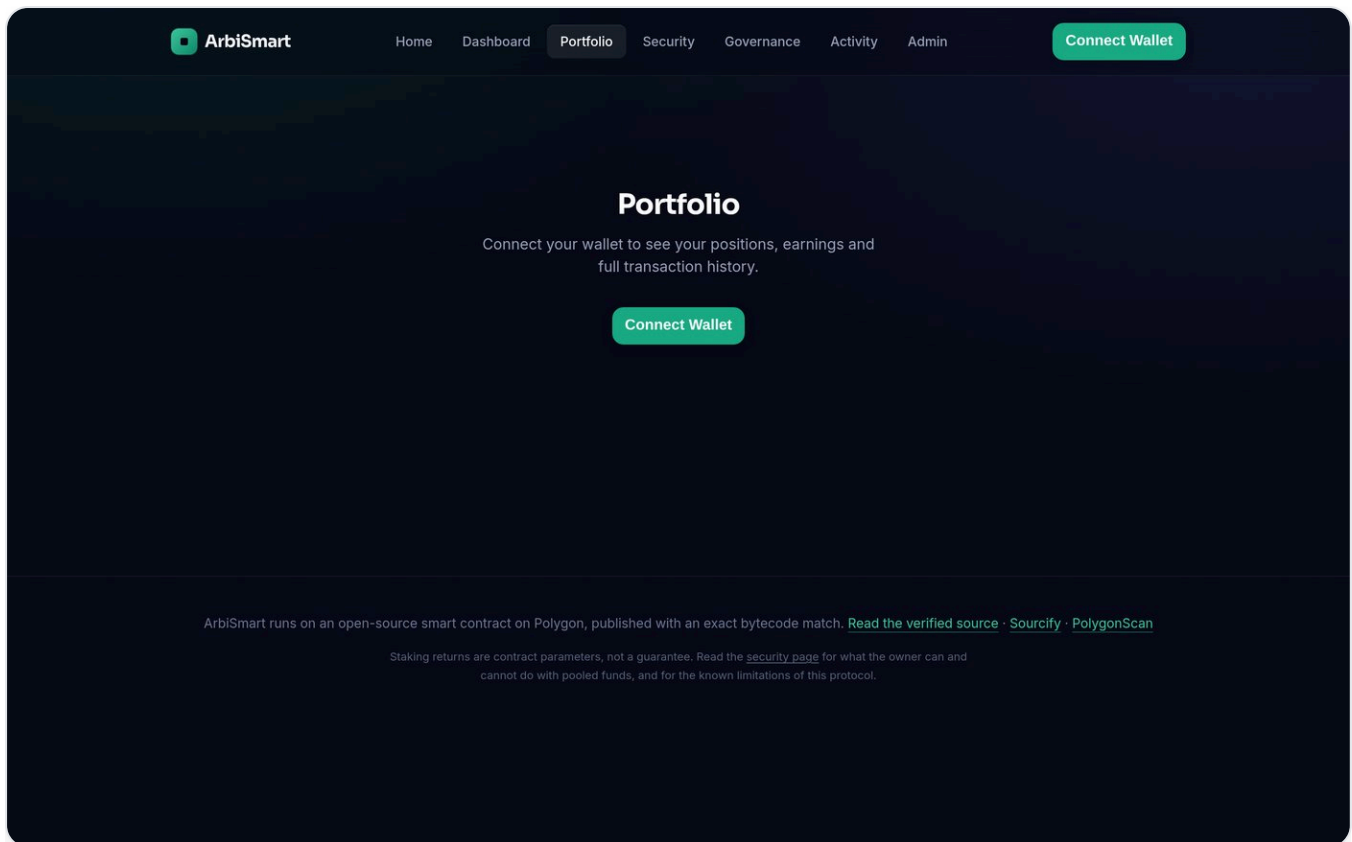

Level up automatically

The more people you refer, the higher your reward percentage climbs — with no extra steps on your part.

YOUR ACCOUNT

Everything in one place: Portfolio

See your full picture any time — how much you've staked, how much you've earned, and your complete history — all in real time.

IF YOU CHANGE YOUR MIND

Leaving early is always allowed

Life happens. You can exit whenever you want, no questions asked, no permission needed. The only thing that changes is a small early-exit fee that gets smaller the longer you stay.

EXIT

Leaving early

You can exit any time without asking permission. The penalty falls the longer you stay, and applies to principal only.

WEEK 1

50%

penalty

WEEK 2

40%

penalty

WEEK 3

30%

penalty

WEEK 4

20%

penalty

WEEK 5+

10%

penalty

Early-exit schedule

One thing to remember

Claim your rewards first if you have any waiting — exiting returns your deposit, but any reward you haven't claimed yet should be claimed beforehand.

Ready when you are

Connect your wallet at arbhub.site and start in under a minute.
